

EDUCATION

- Indian Institute of Technology Kanpur** Kanpur, India
 - B.Tech. in Electrical Engineering; GPA: 9.0/10.0* *Jul. 2013 – May. 2017*
minor in Artificial Intelligence and Linguistic Theory
- Maa Bharati Sr. Sec. School** Kota, India
 - Class XII (CBSE Board); Percentage: 93.0%* *May. 2012 – Apr. 2013*

PUBLICATIONS

- Prakhar Kulshreshtha** and Tanaya Guha, "An Online Algorithm for Constrained Face Clustering in Videos" In IEEE International Conference on Image Processing (ICIP) 2018, Athens, Oct 2018. [[paper](#)][[poster](#)][[code](#)]
- Prakhar Kulshreshtha** and Tanaya Guha, "Building Character Interaction Graph via Online Face Clustering for Movie Analysis", Multimedia Tools and Applications [under review]

EXPERIENCE

- Samsung Research Institute Bangalore** Researcher
 - Advanced Technology Labs* *Jul'17 - present*
 - Team Leader, Creative-Lab:**
 - * Winner of 'SRI-B C-Lab Entrepreneurial Ideation Contest' for the idea 'Vision for quality estimation of food grains'
 - * Led a team of three 'entrepreneurs', creating an app that clicks a photo of a sample of grains spread on a sheet, utilizes U-Net followed by Watershed for instance-segmentation of individual grains, and then classifies each particle, to get a final quality estimate of the sample.
 - * Presented the product at **Samsung C-Lab Fair**, Suwon, South Korea,
 - * PS filed in Indian Patent Office, and a part of the work is to be submitted in **BMVC'19**.
 - Samsung Keyboard team, MM Depth Technology Division:**
 - * Implemented Minimum Jerk Theory(MJT) based swipe generation algorithm for training Keyboard Swipe engine.
 - * Designed and implemented an optimized N-gram based language-model for Indian languages, which resulted in reduction in loading time by **90%**, suggestion generation time by **88%**, and model size by **70%**, while maintaining the same prediction accuracy, when compared to then existing solution.
 - * Solution commercialized into Samsung-Keyboard in flagship devices.
- Signal and Multimedia Processing Lab (SiMPL), IIT-Kanpur** Undergraduate Researcher
 - Dr. Tanaya Guha, Dept. of EE, IIT Kanpur* *Dec'16 - Apr'17*
 - Character Interaction Graphs via Online Face Clustering for Movie Analysis:**
 - * We build Character Interaction Graph (CIG) from a video using the temporal dynamics of the clusters formed via Online Face Clustering, and demonstrate its usefulness for two movie analysis tasks: (i) segmentation of a movie into its high level semantic structures (acts), and (ii) retrieval of major characters in a movie.
 - * The work is under review in **Multimedia Tools and Applications** journal.
 - Online Face Clustering:**
 - * Designed an online face clustering algorithm that processes a video sequentially in short segments of variable length, and uses several spatio-temporal constraints, along with FACENET features, to obtain a robust representation of the facetracks, achieving high clustering accuracy on two benchmark video databases (82.1% and 93.8%)
 - * **published in ICIP'18.**

SELECTED ACADEMIC PROJECTS

- MRI Image Reconstruction From Undersampled K-Space Data** [[ppt](#)][[report](#)][[code](#)]
 - Dr. Tanaya Guha, Dept. of EE, IIT Kanpur* *Jan'17 - Apr'17*
 - Explored and reviewed Compressed Sensing based reconstruction methods for under-sampled MR data like Projection onto Convex Sets (POCS), SparseMRI and Adaptive Dictionary Learning (DictMRI)
 - '**Best Projects Award**' (given to 3 out of 15 projects)
- Online Single Index Model Learning** [[report](#)][[code](#)]
 - Dr. Purushottam Kar, Dept. of CSE, IIT Kanpur* *Jan'17 - Apr'17*
 - Came up with an interesting problem of Online SIM Learning, and utilized SLISOTRON to make a Follow The Leader (FTL) based online algorithm SLISOTRON-FTL

- Proposed a proof for the realizable, noiseless setting. Also showed how the problem of Online Isotonic Regression for 1-Lipschitz function extends into our problem of Online SIM Learning

Stochastic Variational Inference for Hierarchical PMF

[ppt][report][code]

Jan'17 - Apr'17

Dr. Piyush Rai, Dept. of CSE, IIT Kanpur

- Formulated and implemented SVI version of Hierarchical Poisson Matrix Factorization [Gopalan et al., 2015], while the paper only had batch VB updates, resulting in an SVI-HPMF model which is scalable to large datasets

Modifying Stacked Attention Networks Architecture For VQA

[ppt][code]

Aug'16 - Dec'16

Dr. Gaurav Sharma, Dept. of CSE, IIT Kanpur

- Modified the architecture of Stacked Attention Network (SANs), which originally utilized image features to project attention on query-vector, for the problem of Image QA, by trying different attention mechanisms. The modified models performed on par with the original model proposed in paper

Automatic Wheat Grain Quality Estimation

[ppt][report][code]

Aug'16 - Dec'16

Dr. Tanaya Guha, Dept. of EE, IIT Kanpur

- The project was a collaboration with Govt. of India, aimed to introduce automatic grain quality assessment from an image of spread out sample of grain to assist farmers in getting fair price of their produce. Using binary thresholding for segmentation, followed by an SVM classifier model, we were able to distinguish between grain and impurities with an accuracy of 88%
- **Best Project Award** (given to 3 out of around 25 projects)

INDUSTRIAL INTERNSHIPS

Samsung Research Institute-Bangalore

Summer 2016 Internship

May'16 - Jul'16

Mentor: Mr. Vasu Kakkirala, Senior-Engineer, SRI-Bangalore

- Worked on Tizen OS based VR Engine Core, to be embedded in Web Browser for various Samsung Devices like GearVR
- Contributed in profiling of VR pipeline, analysis of Rendering, bug fixes and in refining the VR-Engine interface layer
- Received a **Pre-Placement Offer** for full-time employment as a *Research Engineer* at SRI-B

Khitchdee Technologies-Allahabad

Summer 2015 Internship

May'15 - Jun'15

Mentor: Mr. Rohit Agrawal, CEO, Khitchdee Technologies

- Developed a Windows-app that detects percussive beats in the music and displays synchronized 3D graphics

ACHIEVEMENTS

- Won **SRI-B C-Lab Entrepreneurial Ideation Contest** (2 winners out of 244 pitches)
- Cleared "**Professional**" level of Samsung Electronics Global Software Competency (SWC) test, (**passing rate: 5%**)
- Recipient of Merit-Cum-Means (MCM) scholarship at IITK for Academic Excellence for 6 semesters
- **A*** grade (Outstanding Performance) in *Digital Image Processing* and *Fundamentals of Computing*, IIT Kanpur
- All India Rank **465** in JEE-Advanced 2013 out of 150k candidates (**top 0.3%**)

RELEVANT COURSES

- **Computer Vision:** Recent Advances in Computer Vision, Modeling and Representation Techniques for Images, Digital Image Processing
- **Machine Learning:** Artificial Intelligence Programming, Bayesian Machine Learning, Online Learning and Optimization
- **Programming:** Data Structures and Algorithms, Fundamentals of Computing
- **Mathematics:** Linear Algebra, Probability and Statistics, Complex Analysis, Differential Equations, Partial Differential Equations, Single and Multi-Variate Calculus
- **Signal Processing:** Signals, Systems & Networks, Principles of Communication, Communication Systems, Digital Signal Processing, Statistical Signal Processing

TECHNICAL SKILLS

- **Programming Languages:** C, C++, Python, Java, MATLAB
- **Libraries:** TensorFlow, OpenCV, NLTK, Scikit-Learn
- **Development Tools:** Android-Studio, Visual Studio, Arduino IDE
- **Hardware:** Raspberry-Pi, Atmel Micro-Controllers, Arduino

VOLUNTEER WORK

- Gave Maths and Science tuitions to four Class-5 students from underprivileged families from a nearby village as a **Volunteer** at **PRAYAS, IITK**
- Designed and organised Circuit-Design challenges as **Event Coordinator** in **Techkriti**, the annual Tech Fest at IITK
- Assisted 1st-year students academically by conducting lectures and doubt-clearing sessions as **Academic-Mentor(AM)** for **Electrodynamics** course
